

# Revolutionizing Surgical Precision with Digital Fluoroscopy

# Product Unit Specs

## S-ODI

- Surgical unit for MSK
- 31" monitor on cart
- Live Video overlay
- 17'x17' detector
- 50' SID
- 12' Tech monitor
- 120kV at 20 mA

## C-ODI x

- Clinical unit for extremities
- Live Video overlay
- 10'x12' detector
- 19' SID
- 80kV at 250  $\mu$ A

## C-ODI Lite

- Clinical unit for knees/shoulders, GI and needle guidance
- Live Video overlay
- 10'x12' and 12'x12' detector
- 40' SID
- 80kV at 2mA

*"With C-Arms we just aren't used to looking at the wings for axial rotation since we've only had small images available in the operating room.*

*It's a great example of why a full AP pelvis has the potential to help make our surgery more accurate."*

— J. DEAN COLE, MD / ORTHOPEDIC SURGEON, JEWETT ORTHOPEDIC INSTITUTE
